54. (I) Why is it important for engineering students to study engineering ethics? **(II)** Several notorious cases that have received a great deal of media attention in the past few years have led engineers to gain an increased sense of their professional responsibilities. **(III)** Most engineers are, on the whole, motivated by the size and social impact of their projects. **(IV)** These cases have led to an awareness of the importance of ethics within the engineering profession as engineers realize how their technical work has far-reaching impacts on society. **(V)** Indeed, the work of engineers has always affected public health and safety and influenced business practices and even politics in society.

55. (I) Oil wealth in Venezuela has given rise to grand aspirations ever since 1922, when a blowout of oil sprayed "black rain" over the small town of Cabimas. **(II)** By 1928, Venezuela had become the world's largest oil exporter, with Venezuelans of all classes acquiring costly *Yanqui* tastes. **(III)** In recent surveys, a majority of Venezuelans said they had benefitted from government spending on food and health care as well as on education. **(IV)** In 1976, the government nationalized its subsoil wealth, and high oil prices and stable politics increased the national living standard. **(V)** But by 1980, oil prices began to fall, and hard times followed, making life difficult for most Venezuelans.
