ANLAMI BOZAN CÜMLEYİ BULMA

59. (I) While most early European immigrants to America were farmers, many city dwellers came to the new land as well. (II) These new comers were attracted to the bustling urban centers. (III) As a result, American cities expanded enormously. (IV) The history of the United States is filled with accounts of people who came from all over the world to settle here. (V) New York, for example which had a population of only sixty thousand in 1600, grew to a city of more than one million people in 1860.

A) I B) II C) III D) IV E) V

60. (I) As we live and grow, we learn the culture of society in which we live. (II) Sociologists tell us that the most significant elements of culture that we must learn are values, norms and roles. (III) While values are rather general norms are quite specific. (IV) A collection of the norms connected with a particular position or activity in a society is called a role. (V) History shows us that disagreements over viatl political issues always create violent conflicts within a society.

A) I B) II C) III D) IV E) V

61. (I) Getting through a day without being exposed to the media would be unthinkable. (II) Both directly and indirectly the media have a profound effect on our daily lives. (III) What we eat, what we buy, what we do, even what we think is influenced by he media. (IV) Yet, the question is whether what the media provides us with, can always be good and revealing. (V) According to one study, 64 % of the American public turns on television for most of its news.

A) I B) II C) III D) IV E) V

62. (I) Writing in the 1930s, J.M. Keynes was mainly concerned with unemployment. (II) For hem, the question was why it persisted. (III) Since 1945, the twin objectives of economic growth and full employment have been the primary concern of developed countries throughout the world. (IV) His own answer to this was that employment was determined by the level of output, and this was determined by demand. (V) Therefore, the level of employment could be regulated by managing the level demand.

A) I B) II C) III D) IV E) V

63. (I) From the fourteenth century onwards, especially in Italy, scholars, poets, and artists began to take a new interest in learning. (II) In nearly all the city-states of Northern Italy the power had been seized by certain great families. (III) Instead of studying chiefly theology and the writing of the medieval philosophers, they now turned to the philosophers and began to study them intensively. (IV) The minds of men were now set free and they began to think as they pleased. (V) This new learning soon spread to the rest of Europe and the "Renaissance" was well under way.

A) I B) II C) III D) IV E) V

64. (I) By about 3500 BC., there had been developed in Egypt and Mesopotamia a highly and advanced social and economic life. (II) Copper and Bronze were being used, although on a limited scale, and trading contacts with other countries had been established. (III) it is the opinion of the archaeologists that civilization first developed in the Middle East. (IV) Many of these contracts were with Syria, which, lying between Egypt and Mesopotamia, had participated at an early date in the general advance of material and cultural development. (V) Moreover, Syria was endowed with a number of resources that were looking in Egypt and Mesopotamia.

ANLAMI BOZAN CÜMLEYİ BULMA

77. (I) In 1965 When Mrs. Indira Gandhi became the prime minister of India, she faced serious political problems in the country. (II) For Instance, she followed a pro-Soviet policy and, hence, did not react against the Soviet invasion of Afghanistan. (III) In the first place, she had to consolidate her authority in the Congress Party against the opposition from the Party's old guard. (IV) Also, she had to deal with the terrorist activities in various part of the country. (V) However, she took courageous steps in her rule and won a landslide election victory in 1971.

A) I B) II C) III D) IV E) V

78. (I) To understand the British system of government, it is essential to appreciate the importance of the party system. (II) Naturally, parties exist to form governments, and in Britain the path to this goal lies in the House of Commons, for the party which obtains a majority of seats has the right to form the government. (III) Since the 17th century, two parties have usually been predominant in British politics. (IV) Until the 1920s these were the Tories (the Conservatives) and the Whigs (the Liberals), and since the 1930s the Conservatives and the Labour. (V) So far, many reforms have been introduced to improve the local election system.

A) I B) II C) III D) IV E) V

79. (I) In October 1973, the Arab oil-producing states took the decision to restrict oil supplies to the West and raise oil prices. (II) The restriction of supplies was initiated as a short-run weapon in the Arab-Israeli conflict. (III) In fact, it revealed a potential for obtaining higher prices, which had not previously been exploited by the oil countries. (IV) Most economists argue that the exploitation of North Sea oil has been a mixed blessing for Britain. (V) Being aware of this potential, the international oil cartel OPEC raised the price for a barrel of crud oil from 1.75 US dollars in September 1973 to 7.00 US dollars in January 1974.

A) I B) II C) III D) IV E) V

80. (I) In general, the term "abstract art" is used to describe new movements and techniques in plastic arts in the 20th century. (II) The underlying principle of this art is that it is not the subject stall but form and colour which really possess aesthetic value. (III) Obviously, we cannot disregard the fact that the vitality of art throughout history is closely bound up with some form of religion. (IV) Most art historians suggest that the impressionists, especially Cezanne, can be considered to be the planners of these art. (V) Also, there are some who strongly argue that the origins of abstract are to be sought in the design of primitive people as well as folk art.

A) I B) II C) III D) IV E) V

81. (I) Throughout the Middle Ages, Christian Europe launched many allied expeditions against the Muslim rule in Spain to bring it to an end. (II) Historically the ancient palace of the Muslim rulers at Granada in Spain is called "Alhambra." (III) Originally, it was designed, built and developed into an architectural masterpiece in the 13th and 14th Centuries. (IV) Unfortunately, the stylistic uniformity of the palace was spoiled when in the 16th century, Charles V turned of it into a modern residence. (V) However, the most beautiful parts of the interior, including the Court of Alberta and the Court of Lions, have survived and preserve their original charm.

A) I B) II C) III D) IV E) V

82. (I) It was Engel's in 1844 who first referred to the Industrial Revolution in Britain. (II) For him, the transformation of Britain from a merely agricultural country into a predominantly industrial one was of a revolutionary nature. (III) In the 19th century Britain colonized most of Africa and South East Asia. (IV) Actually, the Industrial Revolution had begun in the late eighteenth century with the mechanization of the textile industry. (V) This was soon followed by major technological and other industrial developments which made Britain prosperous country in the world.

ANLAMI BOZAN CÜMLEYİ BULMA

59. (I) For almost 40 years, relations have been frozen between the United States and Cuba. (II) This is mainly due to the glaring differences between the regimes of the two countries. (III) Many, on both sides, have ceased to hope for an improvement in the relations. (IV) More surprisingly, the recent papal trip to the island has had an effect in Washington, too. (V) Mr. Castro will not ease his grip until he dies; nor will the policy makers in Washington be ready to lift the American embargo against trade with Cuba.

A) I B) II C) III D) IV E) V

60. (I) High oil prices helped Venezuela to emerge, two years ago, from a long recession. (II) Soon the government launched a comprehensive economic reform programme, which was to be financed through the oil revenue. (III) In fact, the flow of money through trade could have enabled them to avoid making unpopular decisions. (IV) However, with the recent precipitous drop in oil prices the economic situation has again begun to deteriorate. (V) In particular, the government seems likely to cut down on the reform programme which it has embarked on with high hopes.

A) I B) II C) III D) IV E) V

61. (I) Some historians point out that cannibalism did not exist before 1492. (II) They would argue that it was invented by Columbus. (III) Of course, this is not to deny that cannibalism was unknown in the ancient world. (IV) It seems always to have existed, or to have been said to exist, usually in "other" places. (V) Therefore, it is true that the word "cannibal" is a corruption of the Amerindian word "Carib", which means "bold" or "fierce".

A) I B) II C) III D) IV E) V

62. (I) Michael Levey's recently published book "Florence: A Portrait" is a masterly survey of Renaissance and post-Renaissance Florence. (II) His portrayal of this magnificent city is that of an eminent art historian elegantly at home in painting, sculpture, and architecture. (III) As one visits this principal city, a dilemma characteristic of post-war Europe is unavoidably insistent. (V) Indeed, it is fascinating to read his learned account of the achievements of the great Florentines like Botticelli, Brunelleschi, Michelangelo and the others.

A) I B) II C) III D) IV E) V

63. (I) They hadn't expected to see rolling hills dotted by family farms with herds of cattle grazing around. (II) Richardson Family is in the southeastern corner of Nebraska, abutting Kansas and Missouri and washed by the Missouri River. (III) It is the heart of the heartland, the American mythologized, in 1943, by Oscar Hammerstein in the lyrics of "Oklahoma". (IV) Yet, today, this part of the prairie America continues to possess very little of its pastoral and traditional charm. (V) Unfortunately, industrialization and reckless urbanization have destroyed much of it and turned the place into a wasteland.

A) I B) II C) III D) IV E) V

64. (I) As recently as the 1980s, poverty rates among the elderly in Britain were more than double those of the population at large. (II) For the experts,.....the transformation of Britain from a merely agricultural country into a predominantly industrial one was of a revolutionary nature. (III) In the 19th century Britain colonized most of Africa and South East Asia. (IV) Actually, the Industrial Revolution had begun in the late eighteenth century with the mechanization of the textile industry. (V) This was soon followed by major technological and other industrial developments which made Britain the most prosperous country in the world.

59. (I) The Morley gallery has once again caught the attention of the public. (II) Its exhibition programme is richly varied and focuses on the lose well-known painters. (III) In the current exhibition, some of the paintings of Joseph Hayward, a promising young painter, re on show. (IV) The gallery is situated on the outskirts of London, but within easy reach of the metro. (V) Examples of his early work, such as a large watercolor of a garden are also included.

A) I B) II C) III D) IV E) V

60. (I) A camera is now being developed that scans the electromagnetic radiation emitted by the human body. (II) The police, after all, never do show any enthusiasm for technological innovations. (III) It may prove to be a great asset in crime detection as hidden objects which distort that radiation-show up as cold spots. (IV) It can detect weapons and drugs hidden beneath layers of clothing. (V) Moreover, it has apparently no dangerous side effects.

A) I B) II C) III D) IV E) V

61. (I) There are clever lawyers and dull ones, fast runners and slow ones, good cooks and bad ones. (II) However, when it comes to the investment, this human variety seems to disappear. (III) Those who manage money and prepare market analysis for companies are naturally well paid. (IV) Numerous studies suggest that "exceptional" investment managers simply do not exist. (V) In any given period each has no more than an even change of doing better than the market index.

A) I B) II C) III D) IV E) V

62. (I) Agricultural teaching in West African schools invariably meets with apathy. (II) Even so, agricultural education is a necessity but it should be directed towards the farmer himself. (III) He needs instruction in new techniques. (IV) The majority of these students acquire a lifelong distaste for all forms of activity. (V) He also needs information on new and profitable cash crops and potential local markets.

A) I B) II C) III D) IV E) V

63. (I) The basic strategy of the war on poverty during the 1960s was to try to give everyone entering the job market comparable skills. (II) Of these, the best mechanism for breaking ties vicious cycle seemed to be educational reform. (III) This meant placing great emphasis on education. (IV) Many people imagined that if schools could equalize people's cognitive skills, these would equalize their bargaining power as adults. (V) In such a system nobody would end up very poor or, presumably, very rich.

A) I B) II C) III D) IV E) V

64. (I) As forests are cut down, many wild animals are finding it harder to survive. (II) Sadly the range of the leopard, for instance, is but a fraction of what it formerly was. (III) They are, for instance, no longer to be found in Europe proper. (IV) Fortunately, there are instances of such endangered species managing to re-establish themselves. (V) In the Caucasus and northern Iran there are still some, but their numbers are decreasing rapidly.

89. (I) Roughly six centuries before crossed the Atlantic, Mayan society abruptly collapsed. (II) No one knows precisely why. (III) Scientists and historians have come up with various suggestions. (IV) Other empires arose in place of the Mayan empire. (V) None of these are in any way original; they include overpopulation, disease, climate change and war.

A) I B) II C) III D) IV E) V

90. (I) Poverty is not primarily hereditary. (II) While children born into poverty have a higher than average chance of ending up poor, there is still an enormous amount of economic mobility from one generation to the next. (III) In this way many parents work to ensure that their children will enjoy easier lives. (IV) Indeed there is nearly as much economic equality among brothers as in the general population. (V) This means that inequality is recreated a new in each generation, even among those who start life in essentially identical circumstances.

A) I B) II C) III D) IV E) V

91. (I) Several months ago the Czech finance minister announced that his country's four biggest banks would shortly be privatized. (II) Even so a poll showed that nearly half of the Czech people opposed the new interest rates in the country. (III) Since then, however, there has been a change of government which naturally slowed down proceedings. (IV) Moreover, a row the value of one of the blanks has further delayed the matter. (V) So has a recent startling concerning loan policies in one of the blanks.

A) I B) II C) III D) IV E) V

92. (I) Fire- fighting is presently getting a boost from technology. (II) Nevertheless, firefighting doesn't rate quite so high in the list of dangerous occupations. (III) With the new system; data-base information gets into the hands of the people on the scene. (IV) As a result, a fire-fighter can immediately determine the location of fire hydrants, hazardous materials, elevator shafts and electrical panels. (V) Further, the planning of rescue routes has become quicker and more reliable.

A) I B) II C) III D) IV E) V

93. (I) The latest cause for concern in drinking water is aluminum. (II) It can occur naturally in petty moor land waters. (III) More often it is added in the form aluminum sulphate to water at treatment works. (IV) Apparently, some countries in the world are not yet fully aware of the danger. (V) Water authorities do this because it removes tiny particles suspended in the water that can make it brown.

A) I B) II C) III D) IV E) V

94. (I) Boston High School is America's oldest and one of its finest public schools (II) Indeed Boston is a city with a large black population. (III) Sarah Wiseman, who is 14, wants to go there. (IV) She applied last autumn and was rejected. (V) That might have been the end of the story except that Sarah found she was one of ten white candidates rejected by Boston High School while ten black candidates with lower scores were admitted.

A) I B) II C) III D) IV E) V

KPDS 1999 KASIM DÖNEMİ

ANLAMI BOZAN CÜMLEYİ BULMA

53. (I) Today the worst problem facing the government of South Africa is unemployment. (II) This now affects a third of the population and is rising rapidly. (III) Actually, the end of South Africa's isolation from the world meant that companies had to cut jobs to be competitive. (IV) Moreover, in order to meet the government's tight deficit targets, there are now cuts being made in the number of the public – service staff, which make unemployment even worse. (V) In the economic sector, the situation is even more hopeful, for there has been a wave of reforms and mergers among banks and insurance companies.

A) I B) II C) III D) IV E) V

54. (I) For governments and institutions, disaster preparedness is of vital importance. (II) This is especially so in countries where the risk of disaster is real. (III) Since disaster preparedness is a multi – sect oral activity, the functions and respective responsibilities of each sector must be clearly defined. (IV) In fact, few types of natural disaster can be predicted accurately. (V) Moreover, a precise division of labor among institutions and agencies, and detailed predisaster planning will reduce enormously the adverse effects of a disaster.

A) I B) II C) III D) IV E) V

55. (I) In Brazil, as in much of Latin America, oil in particular has long been a political symbol. (II) This has been represented by the country's federal oil company Petrobras. (III) Consequently, mismanagement and subsidized pricing paralyzed the system with debt. (IV) When founded in 1952, it was regarded as an icon of emancipation from foreign economic domination. (V) Yet, today the Brazilian government has taken serious steps to end, through privatization, Petrograd's oil monopoly.

A) I B) II C) III D) IV E) V

56. (I) Fish farming, which is practiced in many countries, has developed into an industry in recent years. (II) This has made scientific research into fish biology of vital importance. (III) Hence, advances in disease control and in fish nutrition are likely to be impressive in the years ahead. (IV) Fish farming has succeeded only where it can compete with other forms of food production in terms of costs. (V) Moreover, for most fish species, genetic improvements through breeding have already been achieved to make the industry profitable.

A) I B) II C) III D) IV E) V

57. (I) Heat stroke happens under unusually hot and moist conditions. (II) In either case one must send urgently for medical help. (III) This is because the evaporation of sweat cannot take place in an atmosphere already saturated with moisture. (IV) The patient becomes burning hot with a red dry skin and a fast, forceful pulse. (V) He may suddenly collapse and go into coma.

A) I B) II C) III D) IV E) V

58. (I) Archaeological evidence has shown that the earliest libraries were built by the Sumerians. (II) All libraries are classified to facilitate reference, and the favorite system is the Dewey Decimal System, which divides the whole field of knowledge into ten main classes. (II) These are general works, Philosophy, Religion, Sociology, Philology, Natural Science, Useful Arts and Applied Science, Fine Arts, Literature, and History. (IV) Each of these main classes is again subdivided into ten main divisions. (V) Then, each division is marked by decimals within itself.

A) I B) II C) III D) IV E) V

59. (I) The telephone has come a long distance indeed since Alexander Graham Bell invented the first crude transmitter in 1876. (II) Today we can place calls from automobiles, ships at sea and planes in the air. (III) Using the phone system, we can fax documents around the world. (IV) Most local telephone markets are still monopolized by one company, both here too, competition is growing. (V) Soon we will be able to dial up images of computerized data.

A) I B) II C) III D) IV E) V

60. (I) An international team of researchers has finished a study of the spread of HIV in Africa, (II) Safe sex education needs to be targeted at women and men in countries such as Kenya and Zambia. (III) The results show that teenage women and girls in Africa are up to six times as likely to be infected with HIV as males of the same age. (IV) Their findings also suggest that the AIDS epidemic in Central and East Africa is being caused by older men infecting young girls, who then pass the virus onto their children. (V) In the worst – affected regions, up to half of all pregnant women are now infected with HIV, and 40 percent of them are teenage girls who have had sex with men aged 35 and over.

A) I B) II C) III D) IV E) V

61. (I) It should be stated at the outset that it is the successful farmers with the best quality land who have generally benefited from all the government support. (II) Traditionally the farmers on the Malwa plateau in Central India cultivated a large number of unirrigated wheat varieties. (III) With the introduction to this region in the late sixties of electricity, and the technology for digging deep wells, they were induced to change to irrigated farming. (IV) Moreover, to develop high yielding varieties of wheat appropriate for irrigated farming, the government set up a wheat research center in the area. (V) This was then backed up with the organization of special training courses for farmers.

A) I B) II C) III D) IV E) V

62. (I) The collapse of the economies of southeast Asia in the early years of the decade was later followed by that of Korea, the classic tiger economy. (II) What happens next in a region that is now strewn with the wrecks of so – called economic miracles? (III) This leaves Europe and United States as significant mass markets. (IV) The assumption that recession will spread in the region owing to capital flight and belt-tightening is most plausible. (V) This will deepen as foreign investors increasingly reduce their profile in southeast Asia.

A) I B) II C) III D) IV E) V

63. (I) The first obvious fact about the mass media system is that it is not *controlled* by corporations: it is *made up* of them. (II) Many large corporations are active in the Third World and in the arms trade. (III) Just as corporations do not control the car Industry but the car Industry itself is corporations, so the media is made up of large corporations, all in the business of maximizing profits. (IV) Moreover, media corporations are not simply businesses; they are also owned by even larger parent corporations. (V) It is these parent corporations which influence and formulate the media policies and practices.

A) I B) II C) III D) IV E) V

64. (I) Once, when people dreamt, they dreamt of America; of its high wages, comforts, huge cars and high technology. (II) "If only we could live there or make our country like it." millions said to themselves. (III) But no more. (IV) Today, only the desperately poor, the deluded or the oppressed wish to emigrate to America or build their countries in its image. (V) Finally, the rate of demographic growth in America has shown a downward trend in recent decades.

A) I B) II C) III D) IV E) V

KPDS 2000 KASIM DÖNEMİ

ANLAMI BOZAN CÜMLEYİ BULMA

59. (I) All countries have a central bank, in many cases owned and operated by the government. (II) One of the oldest of the central banks is the Bank of England. (III) The duties of a central bank usually include the issuing of new bank notes. (IV) It originated in 1694 when a number of business men grouped together to form a bank to raise a loan for the government. (V) This bank-government relationship continued to develop and in 1946 the Bank of England was nationalized.

A) I B) II C) III D) IV E) V

60. (I) As supplies of natural resources, prices and so on, change throughout the world, different countries may find their areas of comparative advantage changing. (II) One example of this is in the production of steel. (III) South Korea, for instance, has become increasingly competitive in steel products. (IV) The consumer goods exported from Japan constitute a similar competitive threat. (V) The result is, steelmakers in Western Europe are losing some of their markets to South Korea.

A) I B) II C) III D) IV E) V

61. (I) Solomon is traditionally regarded as one of the wisest kings of ancient times. (II) By the end of his reign his subjects were extremely discontented with his policies. (III) His reputation for wisdom is not without foundation. (IV) Since he inherited a large and relatively peaceful empire from his father, David, he was able to concentrate on economic matters. (V) Soon he proved a genius at exploiting a number of major trade routes as well as developing the copper mines south of the Dead Sea.

A) I B) II C) III D) IV E) V

62. (I) Bonnington is now Britain's best known mountaineer. (II) The book he wrote about the journey was a best-seller (III) He is not, perhaps, as famous as Edmund Hillary, who was the first man to have conquered the world's highest mountain. (IV) But he was the first to reach the top via Everest's previously unclimbed South-West Face. (V) This route had already been attempted on six occasions but on each occasion the result had been a defeat.

A) I B) II C) III D) IV E) V

63. (I) For many centuries most people thought the world was flat. (II) As a result they presumed that if one sailed to the edge of the world one would fall off into space. (III) Columbus postulated that the world was round and that one could sail round it. (IV) There were other great Spanish explorers besides Columbus. (V) He tested his theory and proved empirically that the earth was not flat.

A) I B) II C) III D) IV E) V

64. (I) During World War II submarines played a key role in all the world's oceans. (II) In the Atlantic, German submarines began to sink British shipping far faster than it could be replaced. (III) Consequently, Britain came close to defeat. (IV) The British air force continued to patrol the seas and protect shipping. (V) It was really only the discovery of submarine - detecting radar that saved her.

59. (I) It was July 1789, and the Parisians were excited to fever pitch by the summons of troops to Versailles. (II) For them, the Bastille had long been a symbol of royal absolutism. (III) Everywhere in the country similar incidents were taking place. (IV) So now they seized guns and cannons from the invalids and marched against the Bastille. (V) Since it was poorly defended this fortress passed into the hands of the mob in just four hours.

A) I B) II C) III D) IV E) V

60. (I) Heraclites, an outstanding figure among the early Greek philosophers, was a native of Ephesus. (II) By birth he was an aristocrat, but devoted himself to speculation. (III) There he founded a school lasting down to the time of Plato, who was influenced by his ideas. (V) He is best known for his doctrine of perpetual change and impermanence in nature. (V) Because of this it is usual to contrast him Parmenides, his younger contemporary.

A) I B) II C) III D) IV E) V

61. (I) The provision of a safe water supply constitutes the most important step in preventing water-borne diseases such as cholera. (II) Water for a community is of vital importance. (III) It is obtained in various ways depending on local conditions. (IV) Surface water can be piped from reservoirs, rivers or lakes. (V) Underground water can be tapped by wells.

A) I B) II C) III D) IV E) V

62. (I) It seems that sprinters could get a bigger boost on windy days than athletics authorities ever imagined. (II) Most of the runners found the strong wind very trying. (III) Up to the present, crosswinds have always been ignored. (IV) A physicist from the University of Toronto thinks this is wrong. (V) He has calculated that runners could gain up to 0.6 seconds with a helpful crosswind, which is a great deal as a race can be won by 0.01 seconds.

A) I B) II C) III D) IV E) V

63. (I) The larger a hall is the more difficult it is to make the acoustic effects evenly good. (II) There is also a greater likelihood of echoes. (III) Halls which are used for both speech-making and music recitals have to compromise between the requirements of each. (IV) Actually, the sound heard in such a well-designed hall is superior to that produced by any stereo system. (V) Even different kinds of music require different acoustic effects.

A) I B) II C) III D) IV E) V

64. (I) Even India's own information technology has been hit. (II) Scientific research in India is facing up to a brain drain with a difference. (III) The financial lure of careers in information technology abroad is creaming off more and more of the talented young people who might otherwise become scientist. (V) Addressing the Indian Science Congress last month the Indian Prime Minister referred to this problem. (V) He said that the global demand for Indian computer professionals was a challenge for Indian science.

59. (I) Children very greatly in the rate and pattern of normal development. (II) When a child does not speak it is because he cannot, not because he is lazy. (III) Many factors are involved in these variations apart from intelligence. (IV) For instance, environmental factors play an important part in development. (V) Nevertheless, development does depend on a sufficient stage of maturity having been reached and so ultimately on intelligence.

A) I B) II C) III D) IV E) V

60. (I) Australia has much land relative to its population. (II) On the other hand, Japan has little land relative to its population. (III) All other things being equal, one would expect countries with relatively more land to specialize in products that use more land. (IV) So one expects Australlia to engage in extensive sheep – raising but not Japan, because the cost of raising sheep in Japan would be much higher. (V) Some developing countries, for exampale, cannot, for technological reasons, effectively compete with countries in Western Europe in the manufacture of clothes.

A) I B) II C) III D) IV E) V

61. (I) Gregory Mendel was not the first plant breeder. (II) He reported these and other findings at a meeting of natural scientists. (III) At the time he began his work, hybrid plants and animals had been known for a long time. (IV) His genius lay in his ability to recognize a pattern in the way the parental traits reappear in the offspring of hybrids. (V) No one before had categorized and counted the offspring and analyzed the patterns over several generations.

A) I B) II C) III D) IV E) V

62. (I) In modern international law, territorial jurisdiction is of much greater importance than personal jurisdiction. (II) A sharp distinction has to be drawn between international law and national law. (III) Whereas the latter has its sphere limited to the individual state, international law applies between entitles endowed with international personality. (IV) This feature marks off international law from national law. (V) Indeed, essentially international law is the body of legal rules which govern the relations between sovereign states.

A) I B) II C) III D) IV E) V

63. (I) My own knowledge of Jane Austen's life, character and opinions depends mainly on her letters. (II) Some 150 of these survive. (III) Most are to her sister Cassandra and are really family letters intended for the whole family. (IV) Her nephew was to write a *Memoir* of his aunt, but he was old when he did so. (V) There are only a few written to friends, and these are the ones that reveal most about her.

A) I B) II C) III D) IV E) V

64. (I) The earliest really high buildings belong to Chicago. (II) They have a steel – frame construction. (III) Louis Sullivan was the outstanding architect of this Chicago school of architecture. (IV) More important, however, is the fact that they are truly splendid buildings, with a vigour and sureness and character, that is all their own. (V) It is no wonder that similar buildings began to appear not only in other cities in the US but in other cities throughout the world.

59. (I) The book furnishes us with some really fascinating information about hummingbirds. (II) For instance, they can hover for as long as 50 minutes at a time. (III) Their lovely coloring is even them apparent. (IV) They don't simply use their wings in order to do this, but also their tails which they spread like a fan to give extra lift. (V) Hovering allows access to nectar but requires so much nectar that they have to consume one and a half times their body weight in nectar every day.

A) I B) II C) III D) IV E) V

60. (I) The majority of existing robots do not look even remotely human. (II) Industrial robots are now in demand. (III) At least 750,000 robots work in global industry, according to the World Robotics 2001 survey. (IV) Japan is in the lead, producing twice as many industrial robots as the rest of the world combined. (V) Next comes the European Union, where Germany is the leader.

A) I B) II C) III D) IV E) V

61. (I) Forests come under increasing pressure as the population increases as so many people use firewood for cooking. (II) On the average, one person burns about a metric ton of firewood a year. (III) Another result of deforestation is accelerated soil erosion. (IV) Because of this fuel need, forests surrounding communities have been slowly cut down. (V) As nearby trees are used up for firewood, people travel farther to obtain wood and the size of the deforested area expands.

A) I B) II C) III D) IV E) V

62. (I) In Egypt, with its proximity to the elephants of the Sudan, the craft of ivory carving was carried to a high state of perfection in late predynastic times. (II) Remarkably realistic figures of lions and baboons still survive from this period. (III) Even more remarkable are the statuettes of the 4th – dynasty. (IV) Even quite a small collection of ivory figures can be quite valuable. (V) At a later date the use of ivory continued in a rather different from; to provide inlaid ornamentation for furniture.

A) I B) II C) III D) IV E) V

63. (I) All the main problems today are interconnected. (II) These include, among other things, poverty, environmental devastation, the arms race and disease. (III) The reversal of one will nourish the reversal of the others. (IV) Indeed, poverty is only one of the reasons for these environmental problems. (V) Conversely, if there is an improvement in one, this will be reflected in the others.

A) I B) II C) III D) IV E) V

64. (I) The big divide among economists is no longer over whether there will be a recession in America. (II) A steeper drop in demand will now make overcapacity worse. (III) The debate is now over how deep it will be. (IV) Optimists say there will be a swift recovery. (V) If this does happen, it will be due to lower interest rates and a looser fiscal policy.

46. (1) Everyone knows that software is in and hardware is out, at least as far as start-up companies are concerned. (II) A software company has low manufacturing costs and can make good profits. (III) Mistakes in both hardware and software are easy to correct. (IV) For hardware companies the reverse is true. (V) They have extremely high manufacturing costs and thin profit margins.

A) I B) II C) III D) IV E) V

47. (1) Norway remains aloof from the EU. (II) In contrast to Norway, the Swedish economy relies on multinational giants, not on oil reserves. (III) She sees it far more as a threat to her wealth than as a potential partner. (IV) The other Scandinavian countries, however, are all EU members. (V) They are trying to persuade Norway to join too, but she remains stubbornly resistant.

A) I B) II C) III D) IV E) V

48. (1) In 1912 some of the top mathematicians in the world received letters full of incredibly complex formulas. (II) They came from Madras, India, from a 23-year-old accounts clerk named Srinivasa Rumanian. (III) He claimed to have worked them out in his spare time after leaving school. (IV) It is an ambition one shares with lots of people, of all ages and backgrounds. (V) One of the letters reached Professor G.H. Hardy of Trinity College, Cambridge who soon realized that the formulas were the work of one of the greatest mathematical geniuses of all time.

A) I B) II C) III D) IV E) V

49. (1) In this book on management, the author makes the point that most people are deeply and rightly resistant to being managed. (II) He then goes on to give an attractive solution. (III) The world's business leaders are too often motivated by self-interest, not by a company's performance. (IV) It is that the best way to manage people is to let them manage themselves. (V) This becomes truly meaningful when we are reminded that the best performers are those who both know enough and care enough to manage themselves.

A) I B) II C) III D) IV E) V

50. (1) Global inequality is not just about income. (II) It is also about education for children, access to world markets, control of technology and so on. (III) Nevertheless, the extremes of global inequality are exemplified in a striking fashion in income distribution. (IV) Cheap labour has undoubtedly aided economic development in many of the developing countries. (V) The richest 5% of the world's people have incomes 114 times those of the poorest 5%.

A) I B) II C) III D) IV E) V

51. (I) Global warming is bringing new arrivals to British shores. (II) Since 1980, new fish specials have been caught off the coast of Cornwall. (III) As the water warms up they feel the need to move northward. (IV) Since they are cold-blooded creatures, they have to find suitable surroundings in which to regulate their temperature. (V) Indeed, between 1960 and 1980 no new species were reported any where in the area.

58. (I) A true partnership between developed and developing countries could have achieved a breakthrough. (II) Over the past half-century the dream of a world free from poverty, disease and despair has grown no nearer to fulfilment. (III) In the 1960s, some 60 countries actually grew poorer. (IV) Over the years, 30,000 children have been dying daily of preventable diseases. (V) Further, the spread of AIDS has become the most deadly epidemic in human history.

A) I B) II C) III D) IV E) V

59. (I) The world's population continues to increase. (II) And despite the rise in high-tech agriculture, 800 million people don't get enough to eat. (III) Admittedly, that's often due to a lack of money - the world actually produces enough for everyone, at least for now. (IV) In many African countries, famine has been a major concern for the United Nations. (V) But by 2050 we will have 9 billion mouths to feed, 3 billion more than today.

A) I B) II C) III D) IV E) V

60. (I) It will be a bad year for football clubs across Europe. (II) Having met spiraling wage demands and transfer fees in the belief that increasing television revenues would cover the costs, the realization that they will not, will lead to urgent reform. (III) Clubs across Europe have been given lucrative television contracts. (IV) Middle sized clubs in England, Italy and Germany will be worst affected. (V) At least ten well-known clubs are at risk of bankruptcy.

A) I B) II C) III D) IV E) V

61. (I) The Colosseum in Rome, which was the largest and most famous of the Roman amphitheatres, was opened for use in 80 A.D. (II) Even so, there are others that are in better condition. (III) Elliptical in shape, it consisted of three strays and an upper gallery. (IV) It was principally used for gladiatorial combat. (V) A for its capacity, it could seat up to 50,000 spectators.

A) I B) II C) III D) IV E) V

62. (I) Aerobic dancing, which exercise the whole body, is a popular type of exercise and is available at most community centers. (II) Stress aerobics primarily exercises the muscles in the upper legs. (III) There people can exercise at their own pace with guidance from experience instructors. (IV) Lively music and familiar routines make the workout enjoyable. (V) Further, committing oneself to a schedule and exercising with friends can improve motivation.

A) I B) II C) III D) IV E) V

63. (I) Sir Francis Gallon is an English anthropologist and a pioneer of human intelligence studies. (II) He made important contributions to many fields of knowledge. (III) His research revealed important facts about the intellectual and physical characteristics that are passed on from one generation to the next. (IV) Gallon's family included men and women of exceptional ability one of whom was his cousin Charles Darwin. (V) He also discovered that characteristics of two different generations could be plotted against one another.

58. (I) After decades of experimentation, the first practical and fairly reliable typewriters arrived on the market in the early 1870s. (II) Over the next fifteen years or so they became established in American offices and were soon regarded as indispensable. (III) But they were large and ungainly. (IV) Obviously, these early models printed under the roller, so you couldn't see what you had typed till several lines later. (V) Indeed, one of the early models was built into a table, like a sewing machine and had a pedal to operate carriage return,

A) I B) II C) III D) IV E) V

59. (I) While mega cities are renowned for pollution, they often generate a lot of money. (II) Estimates made during the past two decades suggested that most mega cities would continue to increase at an alarming rate. (III) But contrary to expectations, more people are now leaving many of the world's largest urban areas than are moving in. (IV) For example, the population of Sao Paulo was expected to reach 24 million by the year 2000, but fewer than 13 million live there now. (V) There is a similar situation in cities such as Calcutta, Buenos Aires and Beijing.

A) I B) II C) III D) IV E) V

60. (I) In India, a lower-middle-class group is steadily emerging, (II) It was a long time before any improvements were made to the infrastructure, (III) Further, with the arrival of television, the expectations of these people have risen considerably. (IV) Indians are now demanding better education for their children. (V) They are also asking for tarred roads to facilitate business, and better products and services to make their lives easier.

A) I B) II C) III D) IV E) V

61. (I) The film Last Samurai takes place in Japan in the mid-1870s and is based on the life of Saigō Takamori, a samurai. (II) This samurai lived during the period of transition in which the country's ancient feudal culture, symbolized by samurai warriors, was being rapidly replaced by western ways. (III) Production of the film began at the 1000-year-old Engyōji temple in Hiraneji near Tokyo. (IV) Throughout the film, the producers tried to be true to the elegant simplicity of Japanese architecture. (V) The rest of the film was made in New Zealand, where they built a replica of a 17th century samurai village, and in California.

A) I B) II C) III D) IV E) V

62. (I) Europe has no need for biotechnology. (II) Its people are already well-fed and its farmers receive generous subsidies, (III) Apparently, gene-spliced crops make farming safer, easier and more productive. (IV) Indeed the wealthy European countries are inclined to see farming as a traditional cultural activity, similar to folk dancing that deserves preservation. (V) They don't see it as an economic activity that needs to be maximized.

A) I B) II C) III D) IV E) V

63. (I) Ever since the latter part of the 1990s, industrial pollution is being replaced by vehicle-linked smog in China. (II) Already, Shanghai planners estimate that 90% of the city's air pollution is from motor vehicles. (III) The thick smog over many Chinese cities has huge health costs. (IV) The World Bank estimates that air pollution takes about 5% of China's Gross Domestic Product (GDP) in health care costs and lost productivity from those too ill to work. (V) The nation has placed enormous economic and political capital into developing the car industry and the passenger car is rapidly becoming a symbol of the country's success.

58. (I) In the 1996 movie Phenomenon, John Travolta plays a small-town mechanic, George, who experiences a remarkable transformation. (II) For many people, IQ is the definition of intelligence and high IQ is an unquestioned good. (III) Knocked unconscious by a mysterious flash of light, George Malley awakens to find himself a genius. (IV) Previously, he had been a man of simple interests and modest accomplishments, but suddenly he becomes intellectually insatiable. (V) He devours several books a day, creates invention after invention, beats his former mentor at chess and cracks security codes in his spare time.

A) I B) II C) III D) IV E) V

59. (I) Countries throughout the world appear to be determined to avoid war at any cost. (II) In both France and Germany, governments are seeking to introduce more flexibility into the labour markets. (III) Germany plans to make it easier to fire workers, at least in small firms. (IV) It also plans to curb unemployment and make jobseekers take unattractive jobs. (V) The French are working on similar lines, but hampered by their 35-hour-week.

A) I B) II C) III D) IV E) V

60. (I) The risks of flying and driving are influenced by different parameters. (II) The risk of driving depends largely on the distance travelled. (III) Most people do, in fact, realize that flying is safer than driving, but still get nervous about it. (IV) The risk of flying is primarily affected by the number of takeoffs and landings. (V) Indeed, over a 10-year period, 95 percent of all airline fatalities occurred either during takeoff or during landing.

A) I B) II C) III D) IV E) V

61. (I) Artists were much admired in ancient Greek society for their skill. (II) For example, in the case of vase painting, it was quite common for the painter to sign the vessel in paint before it was fired. (III) This means that numerous vessels are known to be the work of specific artists. (IV) Obviously, art is not restricted to the depiction of scenes or objects. (V) In fact, for the Attic black-figure style, twelve painters are known by name.

A) I B) II C) III D) IV E) V

62. (I) It seems that some form of electric battery may have been in use two centuries before Christ. (II) In 1938 the German archaeologist Wilhelm König found a small oddly configured clay jar near Baghdad that he dated to 200 B.C. (III) In any event, the modern history of batteries begins with the Italian scientist Alessandro Volta. (IV) It has a coiled copper sheet inside and an iron rod extending through the top. (V) When filled with an acid such as vinegar it could have generated 1.5 to 2.0 volts.

A) I B) II C) III D) IV E) V

63. (I) New legislation to ban the slaughter of horses for human consumption in the state of Illinois was introduced on February 6th, 2004, in the Illinois House of Representatives. (II) On February 18th, 2004, the bill was referred to the House Executive Committee. (III) The legislation would also make it illegal to transport horses into or out of the state for slaughter. (IV) The Cavel International slaughter plant was destroyed by fire in March of 2002. (V) The anti-slaughter legislation caused a clash between Horsemen's Council of Illinois, which opposes the bill, and industry associations, welfare groups and animal rights groups that support it.

58. (I) There is no point in pretending to be someone you're not, not even when you're what is called a "paper" wasp. (II) A study at the University of Arizona has shown that these insects are severely punished if they try to mislead others over their social rankings. (III) Actually, their coloring is largely black and yellow. (IV) Scientists used a toothpick and special paint to alter the facial markings of a number of wasps and then analyzed how these "dishonest-insects were treated by their peers. (V) Compared to unaltered wasps, the fakes received far more aggression and harassment.

A) I B) II C) III D) IV E) V

59. (I) Proper testing is often sacrificed when new management systems are being developed. (II) The system must respond with 100 per cent accuracy. (III) As a result, expensive and sometimes catastrophic problems may emerge later. (IV) Why, then, is testing so often neglected? (V) One reason is that testing can be both expensive and time-consuming.

A) I B) II C) III D) IV E) V

60. (I) X-rays, chemical analysis of paint and close scrutiny by expert eyes are all used to tell art forgeries from the real thing. (II) But now computer scientists at America's Dartmouth College have come up with a digital method for sorting the real from the counterfeit. (III) Drawings or paintings are scanned at high resolution and a computer breaks them down into digital elements called wavelets. (IV) An analysis of Madonna with Child by the Renaissance painter Perugino showed that at least four people had worked on the six faces in the painting. (V) The wavelets are then analyzed statistically to find consistencies or differences.

A) I B) II C) III D) IV E) V

61. (I) Lengthy confinement and the isolating sensation of being cut off from Earth could endanger an astronaut's mental stability. (II) In the enclosure of a Mars capsule, feuds, suicide and even murder could occur, which would endanger all aboard. (III) To estimate levels of psychological stress on a Mars mission, Russian space scientists plan to lock six astronauts in a 4,500 square foot imitation spacecraft for 500 days, with limited amounts of water, food and oxygen. (IV) They would then be closely monitored as they went about their daily activities. (V) In fact, even healthy individuals make tiny facial movements when they are under stress.

A) I B) II C) III D) IV E) V

62. (I) A data warehouse is a database that stores current and historical data. (II) In general, data warehouses not only offer improved information, but they make it easy for decision makers to obtain it. (III) Although data administration is a very important organizational function, it has proved very challenging to implement. (IV) In fact, they even have the ability to model and remodel data. (V) These systems also enable decision makers to access data as often as they heed, without affecting the processing performance of the operational systems.

A) I B) II C) III D) IV E) V

63. (I) Carrier companies have made great strides in recent years with the introduction of simple package tracking services. (II) Now they are racing to use the World Wide Web to gain market share by providing more sophisticated services for their customers. (III) Their web sites can handle package scheduling and pickup from start to finish. (IV) As a result, use of the World Wide Web has enabled companies to create new business ventures which wouldn't otherwise have been feasible. (V) Anyone in a major metropolitan area with a package to ship can use web sites to check delivery routes, calculate shipping charges, and schedule a pickup.

46. (I) Whisky began to be marketed commercially in the middle of the nineteenth century. (II) By enlarging and modernizing its distilleries, Scotland was able to dominate the market in Europe and America. (III) Up until then, production had been divided between a few official distilleries and many much smaller, illicit ones, whose produce was almost exclusively for local consumption. (IV) The development of reliable transport systems particularly trains-during the Industrial Revolution meant whisky could travel further a field. (V) And, a few Scottish and Irish traders seized the opportunity to begin exporting their output.

A) I B) II C) III D) IV E) V

47. (I) Infants all over the world begin to smile at about the same age. (II) Whether they are born in a remote African village or in a middle class American home, it seems to make no difference. (III) Unfortunately, this usually occurs when they see familiar faces or hear familiar voices (IV) This suggests that age is more important in determining the onset of smiling than are the conditions of rearing. (V) Moreover, blind babies smile at about the same age as sighted-infants, suggesting it is an innate response.

A) I B) II C) III D) IV E) V

48. (I) In sharp contrast to many other euro-area members, Belgium and the Netherlands have in recent years been able to abide by the aim of the stability and growth pact, with sbudgets in balance or surplus. (II) Now the effects of weaker growth are eroding this sachievement. (III) Their economy's slide intb deficit is a new worry and a reason for belt tightening. (IV) Similarly, Luxembourg, which for years had more Money that it could spent, is moving into the red. (V). In the end they have made concessions on their human srights law to improve relations with America.

A) I B) II C) III D) IV E) V

49. (I) Stained glass windows are part of Britain's heritage.(II) In fact we see them so often that we take the hours of effort that go into creating them for granted. (III) So an exhibition that counterbalances this effect is of particular value. (IV) Actually it is the work of local designers that are particularly interesting. (V) This one does just that by following the whole creative process from the initial designs all the way through to the finished product.

A) I B) II C) III D) IV E) V

50. (I) Egypt's water consumption is limited by international agreement with its upstream neighbors. (II) Existing irrigation systems are outdated and inefficient. (MI) Under the Nil Waters Agreement of 1959 between Egypt and Sudan, Egypt is only allowed to take 55.5 cubic kilometers from the Nil each year. (IV) In fact, its annual consumption is closer to 65.5 cubic kilometers. (V) It makes up the difference by recycling water through various irrigation systems.

A) I B) II C) III D) IV E) V

51. (I) Prints from digital photos last for generations. (II) In fact, they last longer than a traditional print if you use the right combination of printer, ink and specifically formulated photo paper. (III) Indeed lab tests shows that they will not fade or discolours for about 50 years, or as soon as about 75 years if you keep them behind glass. (IV) Fading takes place when prints are exposed to light and contaminants in the air. (V) The layer above it contains polymers that help prevent fading.

58. (I) It used to be argued that, once there were just two major companies involved in civil-aircraft manufacturing, aircraft prices would rise. (II) There are few engineering tricks left that could give one or other a technological edge. (III) That theory has been thoroughly discredited. (IV) The best indicator of new-aircraft prices – the average price per seat on flights – has been declining for several years. (V) This is due, of course, to the brutal competition between the two rivals.

A) I B) II C) III D) IV E) V

59. (I) The most popular talk show on Arab TV is The Opposite Direction. (II) The show is hosted by Faisal al-Kasim, a forty-two-year-old with glasses. (III) The chance to take part in the region's first experiment with free journalism was one that could not be missed. (IV) Al-Kasim moderates while two guests debate a topic of his choosing; viewers join in by telephone, fax and e-mail. (V) No other Arab television personality is as controversial, as despised or as revered as al-Kasim.

A) I B) II C) III D) IV E) V

60. (I) In the past century US life-expectancy climbed from forty-seven to seventy-seven. (II) Similar rises happened in almost every country. (III) And this process shows no sign of stopping. (IV) Such a pill could give us an extra twenty years of life. (V) According to the United Nations, by 2050 global life expectancy will have increased by another ten years.

A) I B) II C) III D) IV E) V

61. (I) Beginning about age 5, the child develops a sense of obligation to follow rules. (II) Indeed, young children change the rules frequently and arbitrarily. (III) He treats them as absolute moral imperatives handed down by some powerful authority. (IV) For him, rules are permanent, sacred and not subject to modification. (V) Obeying them to the letter is more important than any human reason for changing them.

A) I B) II C) III D) IV E) V

62. (I) The eruption of Nevada del Ruiz in Columbia in 1985 illustrates how a lack of monitoring and poor evacuation can lead to loss of life. (II) The eruption itself was a small one and didn't kill anyone. (III) Disaster came later when molten rock melted the ice cap. (IV) This caused mudflows which wiped out 230,000 people. (V) Sometimes there are early signs that an eruption is imminent.

A) I B) II C) III D) IV E) V

63. (I) Teachers naturally welcome information about their students that might help them to teach more effectively. (II) For many, results from standardized assessment tests, such as IQ and academic achievement measures, are one useful source of information. (III) Teachers, however, often interpret a child's quick responses as rude interruptions. (IV) Normally, of course, such tests are designed to be as accurate as possible. (V) There is one famous one, however, that was built around deliberately inaccurate information.

58. (I) Science is systematic because of the attention it gives to organizing knowledge and making it readily accessible to all who wish to build on its foundation. (II) If the results support the hypothesis, the scientist may use them to generate related hypotheses. (III) In this way science is both a personal and a social endeavour. (IV) In other words, it is beneficial both to the individual and to society at large. (V) Moreover, science contributes a great deal to the improvement and the quality of human life.

A) I B) II C) III D) IV E) V

59. (I) As people age, the amount of water in the body decreases. (II) Since many drugs dissolve in water, and since less water is available to dilute them, these drugs reach higher levels of concentration in the elderly. (III) Also, the kidneys are less able to excrete drugs into the urine, and the liver is less able to metabolize many drugs. (IV) For these reasons, many drugs tend to stay in an elderly person's body much longer than they would in a younger person's body. (V) People in every civilization in recorded history have used drugs of plant and animal origin to prevent and treat disease.

A) I B) II C) III D) IV E) V

60. (I) Many Romantic writers in Europe were preoccupied with the fact and idea of revolution. (II) For instance, in the early period of the French Revolution, all the leading English Romantics were in sympathy with it. (III) In fact, they were among its most fervent adherents. (IV) Through the greater part of the eighteenth century, man had been viewed as a limited being in a strictly ordered and essentially unchanging world. (V) Later, even after the first enthusiastic expectations had been disappointed by the events in France, the younger writers felt that its example still constituted humanity's best hope.

A) I B) II C) III D) IV E) V

61. (I) Modern Bergama is a sleepy agricultural market town in the midst of a well-watered plain. (II) There has been a town here since Trojan times. (III) Of Bergama's four main tourist attractions, only the museum is in the centre of the town. (IV) However, it was during the period between Alexander the Great and the Roman domination that Bergama, then called Pergamum, enjoyed its greatest prosperity. (V) At that time, it became one of the Middle East's richest and most powerful small kingdoms.

A) I B) II C) III D) IV E) V

62. (I) Seismic waves are the vibrations from earthquakes that travel through Earth. (II) The Richter magnitude scale was developed in 1935 by Charles F. Richter of the California Institute of Technology to compare the intensity of earthquakes. (III) They are recorded on instruments called seismographs. (IV) Seismographs record a zigzag trace that shows the varying amplitude of ground oscillations beneath the instrument. (V) Sensitive seismographs, which greatly magnify these ground movements, can detect strong earthquakes from sources anywhere in the world.

A) I B) II C) III D) IV E) V

63. (I) In the fall of 2000 and the winter of 2001, Britain was beset by a series of problems. (II) In September 2000, rising oil prices prompted protests by truck drivers and farmers who demanded a reduction in the fuel tax. (III) In November 2000, a series of unusually severe rainstorms and tornadoes caused high flooding and killed 12 people. (IV) In June 2001, Blair won a second landslide victory, with the Labour Party capturing 413 seats in Parliament. (V) In February 2001, foot-and-mouth disease broke out among British livestock, prompting other countries to ban British meat import and forcing the slaughter of thousands of cattle, pigs and sheep.

58. (I) The governments of the EU, the US, China, India, Japan, Russia and Korea initialled a treaty to build the International Thermonuclear Experimental Reactor (ITER), the world's largest fusion machine, in Provence, France. (II) It will take a decade to build and will then run for two further decades, performing tens of thousands of fusion experiments. (III) At the end of that time, say its backers, the world will know once and for all if nuclear fusion is technically viable. (IV) Once this point has been settled, the costs can be taken into consideration. (V) As well as being the largest, the fusion reactor known as JET in Culham, Britain, is, by common consent, the world's most successful.

A) I B) II C) III D) IV E) V

59. (I) In a small firm the manager may perform the role of cost accountant, salesman, personnel officer, stock controller etc. (II) However, as a firm increases in size it can take advantage of specialization of labour. (III) Each managerial role can be allocated to a specialist in that field. (IV) Many firms spend a lot of money on research and development. (V) Furthermore, bigger firms can buy in-management services and afford large in-house salaries to entice and retain the best management.

A) I B) II C) III D) IV E) V

60. (I) Many historians were sceptical that King Arthur was a historical figure. (II) The mystique of Camelot, Arthur's Palace, endures, from Disney films to Broadway musicals to the Kennedy White House. (III) Then, in 1998, scientists unearthed a broken stone at Tintagel Castle on Britain's Cornish coast, long said to be Arthur's stronghold. (IV) The stone bore the Latin inscription Pater Coliavificit Artognou, which translates as "Artognou, father of a descendant of Coll, has had this built". (V) Artognou is pronounced "Arthnou", lending credence to theories that the legendary king was real.

A) I B) II C) III D) IV E) V

61. (I) The road map of South America constantly needs updating. (II) Furthermore, we can expect that it will adversely affect international trade. (III) Hundreds of new bridges, roads and rail lines are turning formerly isolated areas into infrastructure corridors that will accelerate the continent's economic integration. (IV) This vast undertaking, which has largely escaped media attention, is certain to bring unprecedented economic progress within the continent. (V) But it also poses major risks for some of South America's most valuable natural areas.

A) I B) II C) III D) IV E) V

62. (I) Administrative law first came into use in Turkey with the introduction of continental European legal thinking in the 19th century. (II) The most influential model was that of French administrative law. (III) This model developed in the 1890s as a result of the growing influence of Western academic institutions, namely the Law and Political Science Schools in Istanbul. (IV) The model was further developed when a system of administrative courts, modelled on a French pattern, was established by the Republic in 1927. (V) Unlike the German and French Constitutions, the Turkish Constitution does not merely characterize the Republic as a social state.

A) I B) II C) III D) IV E) V

63. (I) Patriarchy does not simply mean that men rule. (II) Otherwise, through a process of cultural evolution, societies that adopted this particular social system maximized their population. (III) Indeed, it is a particular value system that not only requires men to marry but to marry a woman of proper station. (IV) It competes with many other male visions of good life, and for that reason alone is prone to come in cycles. (V) Yet before it degenerates, it is a cultural regime that serves to keep birth-rates high among the affluent while also maximizing parents' investments in their children.

58. (I) The history of the German occupation of France is dirty, tragic, and sometimes darkly comic. (II) It is also one of the most intensely researched subjects of the past decades. (III) In May of 1940, the Germans attacked France, and in June they entered Paris. (IV) More than 8,000 books and articles have been devoted to this subject. (V) However, Julian Jackson's recent book, *France: The Dark Years, 1940-1944*, is an exceptional contribution to the already-accumulated knowledge of the occupation.

A) I B) II C) III D) IV E) V

59. (I) Academics are smart and fast, and, in nonscientific fields such as law and history, they can be very fluent. (II) They are able to supply plausible commentary at short notice on pretty much any subject that engages the interest of the public. (III) The greater that interest, the greater the outpouring of instant commentary. (IV) But when academics speak unprepared, especially about matters outside their area of expertise, the quality tends to go down. (V) Furthermore, topics such as foreign affairs, terrorism, security, the intricacies of politics and the like have been studied extensively.

A) I B) II C) III D) IV E) V

60. (I) Caviar has held a place at the top of Russian menus under czarist, communist, and post-Soviet regimes alike. (II) Until the Russian economic crisis of 1998, even people with modest incomes could afford half a pound or so a month. (III) Caviar has always been treasured in Russia, where people believe that it provides relief from grief and despair. (IV) In Eastern Europe, caviar fetches as much as \$700 a pound. (V) It is also prized for medical reasons since it contains lipids, vitamins, and albumen.

A) I B) II C) III D) IV E) V

61. (I) When searching for land mines, it is exceedingly difficult to distinguish them from the tin cans, spent cartridges, and other metallic debris that litter a war zone. (II) Fewer than one per cent of all signals from de-miners' metal detectors actually indicate land mines. (III) Indeed, civilians have frequently been victims of land mines. (IV) Moreover, the technology used in the field has barely advanced since World War II. (V) Therefore, the clearing process is laborious and inefficient, as well as dangerous.

A) I B) II C) III D) IV E) V

62. (I) Since the days of ancient Carthage, the area that makes up present-day Tunisia has been an oasis of urbanity, relative prosperity, and stable government. (II) Though lacking the oil and natural gas of their Libyan and Algerian neighbors, Tunisia's 9.6 million people are by some estimates sixty per cent middle class, with a poverty rate of only six per cent. (III) Yearly economic growth rarely falls below five per cent, and inflation is about three per cent. (IV) "Africa," originally a Roman term, meant Tunisia long before it meant the continent. (V) Moreover, the World Economic Forum rates Tunisia as the most competitive country in Africa.

A) I B) II C) III D) IV E) V

63. (I) El Salvador is a country tectonically so volatile that its capital city has been destroyed ten times in the past four hundred years. (II) In Latin America, El Salvador is not the first country to switch to the dollar, nor is it likely to be the last. (III) At least twelve major earthquakes shook El Salvador during the twentieth century. (IV) And in this century, disaster did not wait long to strike. (V) In early 2001, an earthquake measuring 7.6 on the Richter scale leveled much of the country, killing almost a thousand people.
